

**Fast and accurate**  
pouch-packaging  
verification system.

- + **Extremely fast**  
*inspects 3 - 5 pouches per second*
- + **Highly sensitive**  
*identifies tablets on shape, color, size and area*
- + **Impressively accurate**  
*98 % of the scans are auto-approved*
- + **Intelligent, self-learning system**  
*automatic detection of new tablets, analysis and data integration*
- + **User-friendly**  
*intuitive application and touchscreen operation*
- + **No process interruption**  
*due to unknown tablets*
- + **Compatible**  
*combines with all known packaging machines*
- + **Flexible**  
*accepts full spools and single pouch strips*
- + **Integrated remote connection**  
*with our Support Center (for support and training)*
- + **Works with a web-application**  
*for checking results, archiving data and validation process monitoring*

The Pouch Inspector is a stand-alone inspection machine that scans the packaged pouches, verifies the content with the ordered medication and customer details and documents the results for further reference.

A roll of pouch strips is placed on the Pouch Inspector. It will instantly scan at a speed of 3 - 5 pouches per second (180 - 300 pouches per minute). No need to push a button, just swipe it through the machine.

## Highly sensitive

The content of each pouch is automatically compared with the prescribed medication and customer details and the results are

stored in the database for processing and documentation.

## Intelligent system

Unknown tablets are marked and automatically integrated into the analysis without process interruption. The inspection status of each pouch is immediately displayed on the screen. The results of an order can either be displayed on the touchscreen or at

a separate PC and the pouches are accordingly manually checked and corrected before the order is approved for dispatch.

## Impressively accurate

The Pouch Inspector has an approval rate of 98 %, which means only 2 % of the pouches need to be examined visually. This can be done by using the web application.

### Dimensions

width: 40 cm 15.75 inch  
depth: 32 cm 12.6 inch  
height: 67 cm 26.38 inch

### Weight

35 kg 77 lb

### Materials

Corian  
Stainless Steel

### Inspection speed

Up to 300 pouches p/min.
