

BESTMED[®]

BESTMED HOME CARE

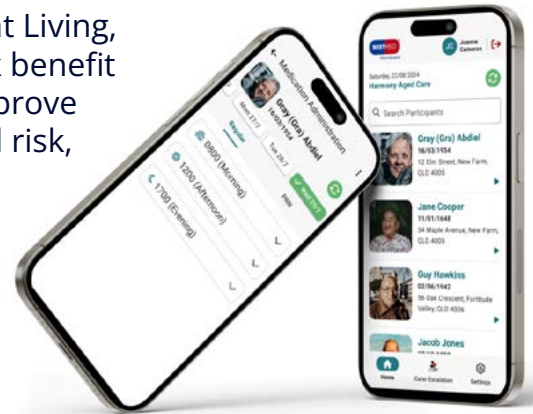

Next generation medication management for NDIS

A CONNECTED MEDICATION MANAGEMENT NETWORK

BESTMED maximises client safety through medication software that seamlessly connects in-home care, Supported Independent Living, carers and pharmacies. All users on the BESTMED network benefit from intelligent automated workflows that significantly improve efficiency, quality and accuracy, helping you reduce clinical risk, and improving transparency.

Co-designed with industry partners, our software supports the medication management of NDIS clients by helping providers:

- ✓ **Gain oversight of medication management**
- ✓ **Boost client medication adherence**
- ✓ **Manage escalations in real-time**
- ✓ **Improve carer efficiency by digitising processes**
- ✓ **Support governance & compliance**

BEST-IN-CLASS TECHNOLOGY

Bringing nearly a decade of experience as Australia's leading medication management, BESTMED provides for a best-in-class technology solution for NDIS providers.

Along with providing enhanced business efficiencies, implementing BESTMED's specialist technology provides carers easy-to-view client-prescribed medications, better visibility of adherence and real-time escalations. All while using their existing mobile phone or tablet.

- ✓ **Fast access to medication & adherence data**
- ✓ **Real-time escalations to care team**
- ✓ **Empower clients with self-administration devices**
- ✓ **Client management system integrations**

And with BESTMED's client profiles syncing to your carer's mobile app, they'll be able to access medication information, update adherence data and raise escalations – anywhere, anytime.
